Biological Data

Biological description	Non-competitive and GluN2B subunit selective NMDA receptor antagonist. Binds at the polyamine site. IC ₅₀ values are 1, >100 and >100 μM for GluN2B, GluN2A and GluN2C respectively. Also inhibits voltage-dependent Ca ²⁺ channels. Shows neuroprotective actions and potentiates anticonvulsant effects of CGP 37849.
