Biological Data

Biological description VU 29 is a potent mGlu₅ receptor positive allosteric modulator ($EC_{50} = 9$ nM). It selectively potentiates mGlu₅ over mGlu₁ and mGlu₂ receptors (EC_{50} values are 557 nM and 1.51 μ M for mGlu₁ and mGlu₂ receptors respectively). **CDPPB** analog.

VU 29 potentiates **DHPG**-induced LTP and TBS-induced LTP in rat hippocampal slices.
