Biological Data

Biological description	Reported to be a potent and selective Ca _v 2.3 (R-type, α1E) channel blocker (IC ₅₀ = 30 nM) and shows incomplete inhibition of Ca _v 1.2 (L-type, α1C). Also shown to inhibit potassium Kv4.3 and Kv4.2 channels and to inhibit A-Type potassium current. Caution should therefore be used when interpreting effects of SNX-482 on cells and circuits when Kv4.3 and Kv4.2 channels are also present.
