DATASHEET

CGP 55845 hydrochloride

Product overview

Name	CGP 55845 hydrochloride
Cat No	HB0960
Alternative names	CGP 55845, CGP-55845, CGP55845,
Biological action	Antagonist
Purity	>98%
Customer comments	<i>Works great! Switching to Hello Bio CGP 55845 from another supplier has saved us literally hundreds of dollars in the last year without sacrificing any quality at all! Indistinguishable in all regards except price. We love it! Verified customer, University of Toronto</i>
Description	Potent, selective GABA _B receptor antagonist

Images

Biological Data

Biological description CGP55845 hydrochloride is a potent and selective GABA_B receptor antagonist (IC₅₀ = 5 nM). It inhibits [3H]CGP 27492 binding (pK_i = 8.35).

CGP55845 hydrochloride inhibits GABA and glutamate release and inhibits GABA_B receptor responses to baclofen (IC₅₀ = 130 nM in an isoproterenol assay).

It enhances responses to hypoglycaemia and shows convulsive actions at high doses.

Solubility & Handling

Storage instructions	Room temperature
Solubility overview	Soluble in DMSO (100mM, gentle warming)
Important	This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not for human or veterinary use.

Chemical Data

Chemical name (2S)-3-[[[(1S)-1-(3,4-Dichlorophenyl)ethyl]amino-2-hydroxypropyl](phenylmethyl)phosphinic acid hydrochloride
