DATASHEET

ML 213

Product overview

Name ML 213 Cat No HB1064 **Biological action** Activator **Purity** >99%

Description Selective K_v7.2 / K_v7.4 channel activator

Images

Biological Data

Biological description

Selective K_v7.2 and K_v7.4 channel activator (EC₅₀ values are 230 and 510 nM respectively). Exhibits >80-fold selectivity for K_v7.2 and K_v7.4 channels over other K⁺ channels. Displays vasorelaxant properties.

Solubility & Handling

Solubility overview Storage instructions Storage of solutions

Shipping Conditions

Important

Soluble in DMSO (50mM) or ethanol (50mM)

+4°C

Prepare and use solutions on the same day if possible. Store solutions at -20°C for up to one month if storage is required. Equilibrate to RT and ensure the solution is precipitate free before use.

Stable for ambient temperature shipping. Follow storage instructions on receipt.

This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not

for human or veterinary use.

Chemical Data

Chemical name Molecular Weight **Chemical structure** N-(2,4,6-Trimethylphenyl)-bicyclo[2.2.1]heptane-2-carboxamide 257.37

Molecular Formula

 $C_{17}H_{23}NO$

Chemical name CAS Number PubChem identifier SMILES InChiKey N-(2,4,6-Trimethylphenyl)-bicyclo[2 .2.1]heptane-2-carboxamide 489402-47-3
