DATASHEET

Sodium butyrate

Product overview

Name Sodium butyrate

Cat No HB1399 **Alternative names** NaB; SB **Biological action** Inhibitor

Description HDAC inhibitor. Directs mESC differentiation into hepatocytes.

Images

Biological Data

Biological description

Histone deacetylase (HDAC) inhibitor (IC₅₀ values are 0.3, 0.3 and 0.4 mM for HDAC1, 7 and 2 respectively). Does not inhibit HDAC6 and HDAC10. Upregulates expression of pluripotency genes in iPSCs and directs mESC differentiation into hepatocytes. Improves cognition and shows anti-Alzheimer's disease and antidepressant actions.

Solubility & Handling

Solubility overview Storage instructions

Shipping Conditions

Important

Soluble in water (100mM)

Room temperature

Storage of solutions Prepare and use solutions on the same day if possible. Store solutions at -20 °C for up to one month if

storage is required. Equilibrate to RT and ensure the solution is precipitate free before use.

Stable for ambient temperature shipping. Follow storage instructions on receipt.

This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not

for human or veterinary use.

Chemical Data

Chemical name Molecular Weight **Chemical structure** Butanoic acid sodium salt

110.09

Molecular Formula

Chemical name

Butanoic acid sodium salt $C^{4H_7NaO_2}$

Chemical name Butanoic acid sodium salt

CAS Number 156-54-7 PubChem identifier 5222465

SMILES [Na+].CCCC([O-])=O

InChi InChi=1S/C4H8O2.Na/c1-2-3-4(5)6;/h2-3H2,1H3,(H,5,6);/q;+1/p-1

InChiKey MFBOGIVSZKQAPD-UHFFFAOYSA-M

MDL number MFCD00002816 Appearance White solid
