DATASHEET

Niclosamide

Product overview

Name	Niclosamide
Cat No	HB1435
Biological action	Inhibitor
Purity	>98%
Description	STAT3 signaling pathway inhibitor. Antineoplastic against AML stem cells.

Biological Data

Biological description	STAT3 signaling pathway inhibitor which inhibits the activation and transcriptional function of STAT3 and induces cell growth inhibition, apoptosis, and cell cycle arrest of cancer cells with constitutively active STAT3. Shows selectivity for STAT3 over STAT1, STAT5, JAK1, JAK2 and Src kinases. Also inhibits mTORC and Wnt/β-catenin pathways. Antineoplastic against AML stem cells. Shows antiproliferative, anticancer, antidiabetic actions. Shows antiparasitic actions and recently investigated as part of COVID-19 compound repurposing.
