Product overview

Name	Mifepristone
Cat No	HB2783
Alternative names	RU486 RU38486
Biological action	Antagonist
Purity	>99%
Description	Potent glucocorticoid and progesterone receptor antagonist. Also used for gene editing as a mifepristone inducible Cas9 and Cpf1 CRISPR effector.

Biological Data

Biological description	Potent glucocorticoid (GR) and progesterone receptor (PR) antagonist (EC ₅₀ values are 2, 10.6 and 9.5 nM at GR, PR-A and PR-B respectively). Also weakly binds the androgen receptor. Shows higher affinity for PRs than progesterone. Shows neuroprotective and antitumor effects. Active <i>in vivo</i> . Also used for gene editing as a mifepristone inducible Cas9 and Cpf1 CRISPR effector.
