DATASHEET

MTEP hydrochloride

Product overview

Name	MTEP hydrochloride
Cat No	HB0431
Biological action	Antagonist
Purity	>98%
Description	Potent, highly selective, non-competitive mGluR ₅ antagonist

Biological Data

Biological description MTEP hydrochloride is a potent, highly selective and non-competitive mGlu₅ receptor antagonist (IC₅₀ = 5 nM and K_i = 16 nM in an *in vitro* Ca²⁺-flux assay).

MTEP has no significant effect on other mGluRs and shows fewer off-target effects than **MPEP hydrochloride**. MTEP shows ~10-fold greater selectivity for mGlu₅ than MPEP.

MTEP also blocks induction of tLTP (timing-dependent long term potentiation) and has antidepressant, anxiolytic and neuroprotective properties.

MTEP is active *in vivo*.

Solubility & Handling

Storage instructions	+4 °C (desiccate)
Solubility overview	Soluble in water (100mM) and in DMSO (100mM)
Important	This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not for human or veterinary use.

Chemical Data

Chemical name	3-((2-Methyl-1,3-thiazol-4-yl)ethynyl)pyridine hydrochloride
