Carboplatin

### **Product overview**

NameCarboplatinCat NoHB3824

Alternative names NSC 241240, Paraplatin, JM 8

Purity >98%

**Description** Cisplatin analog. Blocks DNA replication and transcription.

## **Biological Data**

**Biological description** Potent platinum-based antineoplastic agent. Analog of cisplatin with reduced nephrotoxicity and higher

stability. Antitumor agent. Forms inter- and intrastrand DNA adducts/crosslinks, consequently blocking DNA replication and transcription and inducing cell death. Interferes with cell division by mitosis. The damaged DNA elicits DNA repair mechanisms, which in turn activate apoptosis when repair is impossible. Apoptosis inducer. Enhances radiation-induced single-strand DNA breakage.
