DATASHEET

N ω -Propyl-L-arginine hydrochloride

Product overview

Name	N ω -Propyl-L-arginine hydrochloride
Cat No	HB0466
Alternative names	L-NPA
Biological action	Inhibitor
Purity	>98%
Description	Potent, selective nNOS inhibitor

Biological Data

Biological description	Potent and selective nNOS inhibitor ($K_i = 50$ nM). Highly selective for nNOS over eNOS and iNOS. Shows anti-convulsant actions and decreases blood pressure.
-------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------

Solubility & Handling

Storage instructions	room temperature (desiccate)
Solubility overview	Soluble in water (100mM) or DMSO (100nM)
Important	This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not for human or veterinary use.

Chemical Data

Chemical name	N $^{\epsilon}$ -[Imino(propylamino)methyl]-L-ornithine hydrochloride
Molecular Weight	252.74

Chemical structure

Molecular Formula	C ₉ H ₂₀ N ₄ O ₂ .HCl
CAS Number	137361-05-8
PubChem identifier	447180
SMILES	N=C(NCCC[C@H](N)C(O)=O)NCCC.Cl
InChiKey	AOMXURITGZJPKB-ZETCQYMHSA-N
