### Product overview

<b>Name</b>	Q-VD-OPh
<b>Cat No</b>	HB4048
<b>Purity</b>	>95%
<b>Description</b>	Cell permeable, irreversible and non-toxic pan-caspase inhibitor

### Biological Data

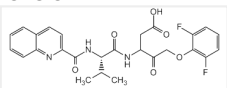

<b>Biological description</b>	Cell permeable, irreversible and non-toxic non-FMK pan-caspase inhibitor with improved potency, stability and toxicity over Z-VAD-FMK. Does not cross-react with cathepsins nor calpains. Non-toxic due to the 2,6-difluorophenoxy methyl (OPh) group. The peptide is not O-methylated to reduce hydrophobicity and to facilitate use in aqueous media. Inhibits ICE-family protease/caspase processing, leading to apoptosis and autophagy induction. Decreases proteasome activity. Used in apoptosis and inflammasome studies.
