DATASHEET

Ibrutinib

Product overview

Name Ibrutinib Cat No HB4204 Purity >98%

Description Potent, selective Bruton's tyrosine kinase (BTK) inhibitor.

Biological Data

Biological description

Potent and selective Bruton's tyrosine kinase (BTK) inhibitor. Orally bioavailable and irreversible inhibitor of BTK ($IC_{50} = 0.5$ nM) with antineoplastic activity. Binds to and irreversibly inhibits BTK activity, preventing B cell activation and B cell-mediated signaling. This leads to an inhibition of the growth of malignant B cells that overexpress BTK. Shown to inhibit autophosphorylation of BTK ($IC_{50} = 11$ nM), phosphorylation of PLCgamma ($IC_{50} = 29$ nM), a substrate of BTK and phosphorylation of ERK ($IC_{50} = 13$ nM).
