DATASHEET

Salvinorin B (SALB)

Product overview

Name	Salvinorin B (SALB)
Cat No	HB4887
Description	Potent, selective KORD DREADD activator
Alternative names	SALB, Divinorin B
Biological action	Activator
Purity	>98%
Customer comments	*High quality with better price. I have compared SalB (Salvinorin B)) from different producer, Hello Bio really provide a high quality compound with a cheaper price. Would definitely order again from here.* **Verified customer, Stony Brook University**

Biological Data

Biological description

Salvinorin B (SALB) is a pharmacologically inert ligand that potently and selectively activates the KORD (the κ-opioid designer receptor (DREADD)) (EC_{50} = 11.8 nM).

Salvinorin B (SALB) is ~100-fold selective for the KORD DREADD over human κ opioid receptor and other targets and shows good CNS penetrability.

Activation of KORD by Salvinorin B (SALB) induces neuronal inhibition and modifies behaviour in vivo.

Salvinorin B (SALB) can be used in mice also expressing Clozapine N-Oxide (CNO) responsive DREADDS, to allow bi-directional manipulation of neural circuits.

CNO dihydrochloride (water soluble), Clozapine N-oxide (CNO) freebase, Compound 21 and perlapine freebase also available.

Solubility & Handling

Storage instructions	-20°C
Solubility overview	Soluble in DMSO (20 mM)
Handling	• This compound is light sensitive; we therefore recommend protecting the solid and solutions from exposure to light. • Salvinorin B (SalB) is unstable in solution and we recommend that solutions are stored at -20°C and used within 24 hours.
Important	This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not for human or veterinary use.

Chemical Data

Chemical name	(2S,4aR,6aR,7R,9S,10aS,10bR)-2-(3-Furanyl)dodecahydro-9-hydroxy-6a,10b-dimethyl-4,10-dioxo-2H-naphtho[2,1-c]pyran-7-carboxylic acid methyl ester

Molecular Weight	390.43
Chemical structure	Molecular Formula	$C_{21}H_{26}O_7$
CAS Number	92545-30-7
PubChem identifier	11440685
SMILES	C[C@@]12CC[C@H]3C(=O)O[C@@H](C[C@@]3([C@H]1C(=O)[C@H](C[C@H]2C(=O)OC)O)C)C4=COC=C4
Source	Extracted from salvia divinorum
InChi	InChI=1S/C21H26O7/c1-20-6-4-12-19(25)28-15(11-5-7-27-10-11)9-21(12,2)17(20)16(23)14(22)8-13(20)18(24)26-3/h5,7,10,12-15,17,22H,4,6,8-9H2,1-3H3/t12-,13-,14-,15-,17-,20-,21-/m0/s1
InChiKey	BLTMVAIOAAGYAR-CEFSSPBYSA-N
MDL number	MFCD16036232
Appearance	Off-white solid
