DATASHEET

Nociceptin

Product overview

Name	Nociceptin
Cat No	HB2424
Biological description	Nociceptin is a 17-amino acid neuropeptide which is the endogenous ligand for the nociceptin (NOP) receptor (previously known as ORL1). Nociceptin shows no activity at the classical μ , δ or κ opioid receptors. The neuropeptide is active in vivo and is involved in a variety of physiological processes. For example, it has been shown to be involved in pain, anxiety, depression, obesity, addiction, hyperphagia, Parkinson's, cognition, cardiovascular, inflammatory and learning and memory.
Alternative names	N/OFG, Orphanin FQ,
Biological action	Activator
Purity	>95%
Description	Endogenous NOP agonist. Involved in a variety of physiological processes.
