# **DATASHEET**

Recombinant mouse Midkine protein

### **Product overview**

Name Recombinant mouse Midkine protein

Cat No HB6469 Species of origin mouse

**Alternative names** Recombinant Mouse Midkine, NEGF-2, Neurite Growth-Promoting Factor 2, MK, Neurite outgrowth-

promoting protein, Midgestation and kidney protein, Amphiregulin-associated protein, ARAP, Neurite

outgrowth-promoting factor 2, FLJ27379, Midkine, MK1, NEGF2.

**Purity** 

Mouse Midkine recombinant protein Description

### **Biological Data**

**Application notes** Fully biologically active when compared to standard. Determined by its ability to chemoattract human

neutrophils using a concentration range of 10-100 ng/ml corresponding to a specific activity of

10,000-100,000IU/mg.

## **Solubility & Handling**

Solubility overview To make a stock solution, reconstitute in sterile  $18M\Omega$ cm water at a concentration >  $100\mu$ g/ml, which

can then be diluted to make a working solution

Handling • Solutions should be made in sterile deionized water (not less than 100 µg/ml). This solution can then be further diluted with other aqueous solutions.

• Following reconstitution, solutions may be stored at 4°C and are useable for around 2-7 days and for future use store at -18°C.

• Freeze-thaw cycles should be prevented.

**Important** This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not

for human or veterinary use.

### **Chemical Data**

**UniProt ID** P12025 Source E. Coli.

White lyophilized powder (sterile filtered & freeze-dried) **Appearance Formulation** Lyophilized from a 0.2µm filtered solution in PBS (pH 7.4)
