DATASHEET

tatM2NX

Product overview

Name tatM2NX Cat No HB7349

Biological description Novel, potent and cell permeable TRPM2 antagonist (IC₅₀ = 396nM). Prevents ligand binding and

TRPM2 activation. Inhibits over 90% of human TRPM2 channel currents at concentrations as low as 2 µM. Shows neuroprotective effects in animal models of focal and global ischemia. Active *in vivo*.

Biological actionPurity
Antagonist >93%

Description TRPM2 antagonist. Cell permeable.

Solubility & Handling

Storage instructions -20°C

Solubility overview Soluble in aqueous buffer

Storage of solutions Prepare and use solutions on the same day if possible. Store solutions at -20 °C for up to one month if

storage is required. Equilibrate to RT and ensure the solution is precipitate free before use.

Shipping Conditions

Important

Stable for ambient temperature shipping. Follow storage instructions on receipt.

This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not

for human or veterinary use
