# DATASHEET

LUF7746

#### **Product overview**

Name LUF7746 Cat No HB6921

**Biological description** The first covalent hA<sub>1</sub>AR partial agonist which irreversibly activates the receptor (apparent pK<sub>1</sub> values at CHO-hA<sub>1</sub>ARs are 7.7 and 8.4 (after 4h), where a K<sub>i</sub> shift indicates a covalent mode of action).

Shown to covalently bind to the A<sub>1</sub>AR receptor under many different experimental conditions. The Y271<sup>7.36</sup> tyrosine residue within the hA<sub>1</sub>AR binding pocket has been demonstrated as the primary

anchor point for this covalent interaction.

LUF7746 is a valuable probe for further mapping the receptor activation process. Sold under license from the Oncode Cancer Institute and Universiteit Leiden

**Biological action** 

Agonist Purity >95%

Description The first covalent hA<sub>1</sub>AR partial agonist. Binds Irreversibly.

## Solubility & Handling

Storage instructions -20°C Solubility overview

Soluble in DMSO

Storage of solutions Prepare and use solutions on the same day if possible. Store solutions at -20°C for up to one month if

storage is required. Equilibrate to RT and ensure the solution is precipitate free before use.

**Shipping Conditions** Stable for ambient temperature shipping. Follow storage instructions on receipt.

**Important** This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not

for human or veterinary use

#### **Chemical Data**

Chemical name 4-((3-((6-Amino-4-(benzo[d][1,3]dioxol-5-yl)-3,5-dicyanopyridin-2-yl)thio)propyl)carbamoyl)benzenesul

fonyl fluoride 539.6

Molecular Weight Chemical structure

C24H18FN5O5S2

167312225

Molecular Formula **PubChem identifier** 

**SMILES**  $\texttt{C1OC2} = \texttt{C(O1)C} = \texttt{C(C=C2)C3} = \texttt{C(C(=NC(=C3C\#N)SCCCNC(=O)C4} = \texttt{CC} = \texttt{C(C=C4)S(=O)(=O)F)N)C\#$ 

InChiKey ZDQUUOSIWXZJJE-UHFFFAOYSA-N

Licensing details Sold under license from the Oncode Cancer Institute and Universiteit Leiden
