# **DATASHEET**

Western Blot Stripping Buffer

#### **Product overview**

Name Western Blot Stripping Buffer

Cat No HB7756

**Biological description** Hello Bio Western Blot Stripping buffer allows the effective removal of primary and secondary

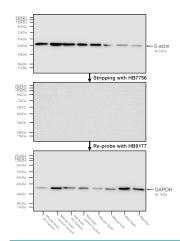

antibodies from a PVDF or nitrocellulose membrane in order to facilitate subsequent reprobing of chemiluminescent Western blots. It protects membrane bound proteins and is quick and effective while

not requiring use of a fume hood or elevated temperatures.

**Applications** WE

**Description** Buffer for stripping of chemiluminscent Western blots

## **Biological Data**

Application notes

### **Stripping Protocol**

- 1. Wash any remaining ECL solution off the membrane with a quick wash in PBS
- 2. Incubate twice for 10 minutes each in fresh stripping buffer
- 3. Wash membrane briefly in two changes of PBST (PBS with 0.1% Tween20)
- 4. Wash membrane 3 times in PBST for 5 minutes per wash
- 5. Block memrane before proceeding with reprobing.

For any more details on Western Blotting techniques please see our Western blotting protocol.

### **Solubility & Handling**

Storage instructions

Room temperature. Do not refrigerate.
