DATASHEET

MightyMount™ Antifade Fluorescence Mounting Medium (aqueous)

Product overview

Name

MightyMount™ Antifade Fluorescence Mounting Medium (aqueous)

Cat No

HB9854

Biological description**Overview**

MightyMount™ Antifade Fluorescence Mounting Medium (aqueous) is an ideal formulation for prevention of photobleaching of fluorescent proteins and dyes during fluorescent imaging. It is easy to use with an ideal refractive index and provides effective prevention of photobleaching.

Applications: IHC(IF), ICC, Cellular imaging, Super-resolution microscopy

Mounting: Aqueous (non-setting)

Antifade: Yes

Counterstain: None

Refractive index: 1.45

Other Mounting Media Products

We supply a full range of mounting media for a range of experimental needs:

Hardset:

- HB6966 - MightyMount™ Antifade Fluorescence Mounting Medium (hardset)
- HB8459 - MightyMount™ Antifade Fluorescence Mounting Medium with DAPI (hardset)
- HB7033 - MightyMount™ Antifade Fluorescence Mounting Medium with Propidium Iodide (hardset)
- HB7508 - MightyMount™ Antifade Fluorescence Mounting Medium with Phalloidin-TRITC (hardset)

Aqueous:

- HB7618 - MightyMount™ Antifade Fluorescence Mounting Medium with DAPI (aqueous)
- HB8761 - MightyMount™ Antifade Fluorescence Mounting Medium with Propidium Iodide (aqueous)
- HB9417 - MightyMount™ Antifade Fluorescence Mounting Medium with Phalloidin-TRITC (aqueous)

Applications**Description**

ICC, IF, IHC(IF)

Antifade aqueous fluorescence mounting medium for use in IHC(IF) and ICC.

Biological Data

Application notes

Protocol for use of mounting media

IHC(IF)

1. Mount sections onto subbed or charged microscope slides and air dry (in the dark) until sections are moist but all excess liquid has evaporated
2. Add a few drops of mounting media around the sections (around 50µl but this will depend on the number and thickness of sections) and slowly lower the coverslip from one end of the slide to the other being careful to avoid creating any bubbles.
3. Use clear nail varnish to seal the edges of the slide to avoid movement during imaging and stop evaporation.

For more information on IHC(IF) including tips on how to mount sections, please see our [IHC\(IF\) protocol](#)

ICC

1. Add a drop of mounting medium (Around 5µl for a 10mm and 15µl for a 22mm coverslip) to a standard microscope slide.
2. Briefly rinse the coverslip in dH₂O before placing face down into the drop of mounting medium being careful not to introduce bubbles.
3. Use clear nail varnish to seal the edges of the coverslip to avoid movement during imaging and stop evaporation.

For more information on ICC please see our [ICC protocol](#)

Solubility & Handling

Storage instructions	+4 °C or -20 °C long-term. Protect from light.
Storage of solutions	Prepare and use solutions on the same day if possible. Store solutions at -20 °C for up to one month if storage is required. Equilibrate to RT and ensure the solution is precipitate free before use.
Shipping Conditions Important	Stable for ambient temperature shipping. Follow storage instructions on receipt. This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not for human or veterinary use.
