## DATASHEET

### Annexin V-PE Apoptosis Staining / Detection Kit

---

#### Product overview

<b>Name</b>	Annexin V-PE Apoptosis Staining / Detection Kit
<b>Cat No</b>	HB8164
<b>Biological description</b>	Identifies early apoptotic, necrotic and viable cells. One-step staining procedure which detects apoptosis by staining exposed phosphatidylserine (PS) which have translocated to the external cell surface. This allows detection of membrane changes that occur in early apoptotic cells. The kit is able to differentiate between: <ul style="list-style-type: none"><li>• <b>Apoptotic cells:</b> Stained by Annexin V-PE but not 7-AAD</li><li>• <b>Necrotic cells:</b> Stained by both Annexin V-PE and 7-AAD</li><li>• <b>Live cells:</b> Stained by neither Annexin V-PE and 7-AAD</li></ul>
	This kit contains: <ul style="list-style-type: none"><li>• Annexin V-PE Staining solution</li><li>• 7-AAD Staining solution</li><li>• 10x binding buffer</li></ul>
<b>Biological action</b>	Kit
<b>Applications</b>	Cell Culture, FACS and flow cytometry, ICC
<b>Description</b>	Detects apoptosis by staining phosphatidylserine molecules translocated to the outside of the cell membrane.

---

#### Biological Data

<b>Application notes</b>	Please follow <a href="#">this link</a> to a full Annexin V-PE staining protocol
--------------------------	--

---

#### Solubility & Handling

<b>Storage instructions</b>	+4 °C
<b>Important</b>	This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not for human or veterinary use.

---

#### Chemical Data

<b>Excitation</b>	565 nm
<b>Emission</b>	574 nm

---
