DATASHEET

Cutting Solution Instant Powder (packets)

Product overview

Name	Cutting Solution Instant Powder (packets)
Cat No	HB8881
Biological description	Cutting solution is widely used in electrophysiological experiments to preserve brain activity while preparing <i>ex-vivo</i> brain slices. Simply add each packet to 1L of dH ₂ O, mix and bubble with carbogen to make 1L of cutting solution.

Key features:

- Save time using preformulated individual aCSF packets - each packet dissolves in seconds and there's no need to add Mg²⁺ or Ca²⁺
- More reproducible with each pack's highly accurate formulation - less error for better data.

Description	Contains (in mM): Sucrose 205. Glucose 10, NaHCO ₃ 26, KCl 2.5, NaH ₂ PO ₄ 1.25, CaCl ₂ 0.5, MgSO ₄ 5 Preformulated packets to make cutting solution for electrophysiology.
--------------------	---

Solubility & Handling

Storage instructions	RT. Add packet contents to 1L dH ₂ O
Handling	Add the contents of each packet to 1000ml of dionised water and mix well. Bubble with carbogen and chill before use.
Important	This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not for human or veterinary use

Chemical Data

Kit contents	Preformulated packets each making 1L of cutting solution
