DATASHEET

Cutting Solution Instant Powder (packets)

Product overview

Name Cutting Solution Instant Powder (packets)

Cat No HB8881

Biological descriptionCutting solution is widely used in electrophysiological experiments to preserve brain activity while preparing *ex-vivo* brain slices. Simply dissolve the contents of each packet in dH₂O to a final volume of

1L, mix and bubble with carbogen to make 1L of cutting solution.

Key features:

- Save time using preformulated individual aCSF packets each packet dissolves in seconds and there's no need to add Mg²⁺ or Ca²⁺
- More reproducible with each pack's highly accurate formulation less error for better data.

Contains (in mM): Sucrose 205. Glucose 10, NaHCO₃ 26, KCI 2.5, NaH₂PO₄ 1.25, CaCl₂ 0.5, MgSO₄

5

Description Preformulated packets to make cutting solution for electrophysiology.

Solubility & Handling

Storage instructions RT. Dissolve each pack in dH₂O to 1L final volume.

Handling

Dissolve the contents of each packet in dH₂O to a final volume of 1000ml and mix well. Bubble with

carbogen and chill before use.

Important This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not

for human or veterinary use

Chemical Data

Kit contents Preformulated packets each making 1L of cutting solution
