DATASHEET

JC-10 Mitochondrial Membrane Potential Assay Kit

Product overview

Name Cat No Biological description

JC-10 Mitochondrial Membrane Potential Assay Kit HB13032

JC-10 is a highly soluble fluorescent probe ideal for assessing mitochondrial membrane potential. In healthy cells with polarized mitochondria, JC-10 aggregates, emitting a strong orange fluorescence (Ex/Em: 540nm/590nm). However, in cells with depolarized mitochondria, a hallmark of apoptosis and other cellular stresses, JC-10 reverts to its monomeric form, resulting in a shift to green fluorescence (Ex/Em: 490nm/525nm). This reversible, ratiometric change in fluorescence emission provides a reliable indicator of mitochondrial health. JC-10's superior aqueous solubility to JC-1 makes it a convenient and robust tool for various applications, including fluorescence microscopy, flow cytometry, and high-throughput screening.

This kit contains everything needed to make 25 mL of working solution which is suitable for five 96-well plates or 500 flow cytometry samples.

Biological action Applications Kit contents Dyes & stains

fluorescence imaging, live cell imaging

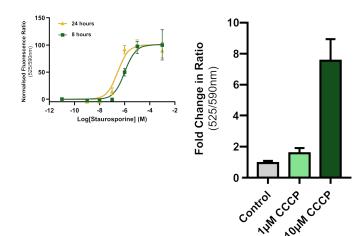

- 100x JC-10 dye in DMSO (250µl)
- Dye loading buffer (25ml)
- Masking buffer (25ml)>98%

Purity

Description

Fluorescent mitochondrial membrane potential assay kit

Biological Data

Solubility & Handling

Storage instructions -20°C

Storage of solutions Prepare and use solutions on the same day if possible. Store solutions at -20 °C for up to one month if

storage is required. Equilibrate to RT and ensure the solution is precipitate free before use.

Handling JC-10 is light sensitive; exposure to light may affect compound performance. We therefore recommend

storing the solid material and any solutions in the dark and protecting from light.

Shipping Conditions

Important

Stable for ambient temperature shipping. Follow storage instructions on receipt.

This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not

for human or veterinary use

Chemical Data

Chemical name (2E)-5-chloro-2-[(E)-3-(5-chloro-1,3-diethylbenzimidazol-1-ium-2-yl)prop-2-enylidene]-1,3-diethylbenzi

midazole;iodide

Molecular Weight Chemical structure

583.3

Molecular Formula C₂₅H₂₉Cl₂IN₄

CAS Number 5563-28-0 PubChem identifier 171361437

InChiKey WBMULJOQZAKELP-UHFFFAOYSA-M

 $\begin{array}{lll} \textbf{Excitation} & 490 \text{nm} \, / \, 540 \text{nm} \\ \textbf{Emission} & 525 \text{nm} \, / \, 590 \text{nm} \\ \end{array}$
