DATASHEET

Human Amyloid Beta 1-42 (Aβ 1-42) ELISA Kit

Product overview

Name	Human Amyloid Beta 1-42 (Aβ 1-42) ELISA Kit
Cat No	HB9635
Description	ELISA kit for detection and quantification of human Amyloid Beta 1-42
Analytical sensitivity	Limit of Detection (LOD): 13.1 pg/ml
Precision	Limit of Quantification (LOQ): 40.0 pg/ml Intra-Assay (%CV within a plate): 5.5 - 8.5% across three replicate plates
Linearity	Inter-assay (%CV between plates): 6.4% across three replicate plates
Recovery	Average recovery (ranging from undiluted to 1 in 16 dilution): 97.8% - 106.5% Average recovery of 105.4% in assay buffer and 106.0% in aCSF
